Parents and family members of children and adults with disabilities or special needs may be matched for the following conditions or concerns:
(please note: list is not inclusive)

• Physical disabilities
• Developmental disabilities
• Special health care needs
• Behavioral/mental health concerns
• Foster care or adoption
• Educational issues
At Hersheypark®, we are committed to providing all of our guests a safe, enjoyable, and memorable visit. Many Hersheypark attractions are dynamic and thrilling. Each attraction is rated for its special features, such as high speeds, sharp turns, sudden slopes, drops, twists, or other dynamic forces. Some attractions may have restrictions for guests of exceptional size (height or weight). Please carefully review and consider the requirements and restrictions of our attractions (which are listed in this Guide and at the entrances to our attractions) to determine if you or members of your party can safely participate. If you have any impairment or condition that would prevent you from properly using the seating and safety restraints or from following any safety requirement, **DO NOT RIDE**. Guests requiring accommodation are invited to visit our Guest Services locations inside the park for information on accessibility and other services.

This Rider Safety & Accessibility Guide provides information on the recommendations and restrictions for each attraction. Please read through this Guide to learn more about the services we provide, as well as particular attraction information. Should you have any questions, please do not hesitate to stop by our Guest Services locations. **Please Note:** The information in this Rider Safety & Accessibility Guide is subject to change. Please feel free to visit our Guest Services locations for current information on accessibility and services.

**ATTRACTION ACCESSIBILITY PROGRAM**

The Hersheypark Attraction Accessibility Program is designed to allow guests to participate in the enjoyment of our Park as much as possible. Each Hersheypark attraction has been evaluated for the criteria necessary for an individual to ride safely. Our ridership criteria (set forth on page 10 of this Guide) are based on the requirements of the attractions’ manufacturers and the ability of guests to utilize all safety restraints and devices as designed, while maintaining the proper riding position throughout the duration of the ride. It is our policy to allow anyone to ride who meets all of these requirements and is not a hazard to themselves or others. Our Attraction Accessibility Program matches the individual abilities of our guests to the ridership criteria for each attraction. The following procedures apply to guests who wish to participate in our Attraction Accessibility Program:

1. Guests can enroll in our Attraction Accessibility Program at any Guest Services location where guests will be asked to complete and sign an Attraction Accessibility Questionnaire. Based on the responses to the questionnaire, guests will receive an Attraction Boarding Pass with a list of attractions they may be able to enjoy.

2. Only those guests with mobility impairments (which generally require the use of assistive devices, such as wheelchairs, ECV, walkers, canes, or crutches) and certain qualifying accommodation needs will receive an Attraction Boarding Pass that will allow them access through each Hersheypark attraction’s accessible entrance or *Fast Track*™ program entrance. This accommodation is designed to provide access to our attractions and not to bypass others waiting in the queue. In an effort to be fair to all of our guests, only those guests with a mobility impairment or other qualifying accommodation need and up to three riding companions will be permitted to access attractions through the accessible/Fast Track entrance. Participation in the Attraction Accessibility Program does not guarantee access through the accessible/Fast Track entrance.
3. Qualifying guests should proceed to the attraction's accessible entrance/ Fast Track entrance and inform Park personnel that they wish to ride. If the entrance is not staffed, or if there is not a separate Fast Track entrance, guests may go to the attraction exit. Guests will need to show Park personnel their Boarding Pass. Park personnel will verify that the attraction is listed on the Attraction Boarding Pass and that the guest meets all attraction rider requirements including height. If the attraction is not listed or if the guest does not meet attraction rider requirements, the guest will not be permitted to ride. Guests may be required to wait several ride cycles prior to boarding. The guest qualifying for access to the attractions through the accessible/ Fast Track entrance must ride in order for their companions to ride.

4. Only those guests with an Attractions Boarding Pass (and up to three riding companions) will be permitted to enter through the accessible/ Fast Track entrance. All other guests, including additional members of the guest’s party, will need to enter the attraction using the designated attraction entrance and queue.

**ATTRACTION SAFETY**

Many amusement park attractions incorporate safety systems designed by the manufacturer to accommodate people of average physical stature and body proportion. These safety systems may place restrictions on the ability of an individual to safely experience an attraction. In addition, many Hersheypark attractions feature high speeds, sharp turns, sudden slopes, drops, twists, or other dynamic forces. Guests should be in good health and know their physical condition and limitations. Guests should not participate in an attraction if they know or suspect they may be pregnant, have high blood pressure, heart, neck, or back problems, motion sickness, recent surgery, or any other condition that may be affected by the features of the attraction. Guests should not participate in an attraction if they have an impairment or condition that would prevent the intended use of seating and safety restraints as provided or inability to follow any safety requirement.

All written and verbal safety warnings and instructions, including height requirements, for each attraction apply to all guests, including those participating in the Attraction Accessibility Program. Prior to boarding an attraction, guests must be able to demonstrate an ability to understand, participate, and follow all attraction requirements. This includes, but is not limited to, demonstrating an ability to maintain the proper riding position, paying attention to and complying with safety instructions, and properly using restraints and safety equipment. Park personnel reserve the right to deny entrance to an attraction based on safety considerations.

**GENERAL INFORMATION**

With the exception of Dry Gulch Railroad and Carrousel, all Hersheypark attractions require guests to transfer from their wheelchairs or other mobility devices to the attraction units. Guests who require assistance during their Hersheypark experience, including being lifted into or out of an attraction, will need to be accompanied by a Supervising Companion (as defined on page 9) or other member of their party who will be able to provide such assistance. Park personnel may not assist with the lifting or transferring out of wheelchairs or other mobility devices.

**SAFETY WARNINGS**

**BEFORE EXPERIENCING AN ATTRACTION:**

**PLEASE NOTE ALL SAFETY WARNINGS - BOTH VERBAL & WRITTEN - FOR EACH ATTRACTION**

Pennsylvania Rider Safety Act No. 1994-58 requires that riders must obey all warnings and restrictions regarding rides and must behave in a manner that will not cause or contribute to injury of themselves or others. Failure to comply is cause for dismissal from the Park without refund.

Please note all written and verbal safety warnings and instructions for each attraction and follow all directions given by Park personnel, such as:

- Please wait for all attractions to come to a complete stop before attempting to board.
- Please exercise caution in boarding each attraction.
- Once seated, secure the seat belt, lap bar, and/or shoulder harness and keep them fastened until the attraction comes to a complete stop.
- Shoes are required on all attractions with the exception of Bayside Pier, Breakers Edge Water Coaster, Coastline Plunge, East Coast Waterworks, Intercoastal Waterway, Tidal Force, Sandcastle Cove, Shoreline Sprayground, and The Shore. Loosefitting shoes must be removed prior to riding the following attractions: Great Bear, Skyrush, The Claw, Wave Swinger, Skyview, Whitecap Racer, Hershey Triple Tower, and Candymonium.
- Keep all body parts (hands, arms, legs, long hair, etc.) inside the attraction unit at all times.
- Remain seated facing forward in an upright position with your back and shoulders against the seat back and hold on until the ride comes to a complete stop.
- Secure all loose articles (glasses, hats, wallets, keys, scarves, cell phones etc.) or leave them with a non-rider. Guests are responsible for their personal property.
- No picture taking or video recording while riding.
- Failure to comply with safety warnings and instructions may result in guests being denied entrance to an attraction and/or removal from the Park with NO REFUND GIVEN.
GENERAL INFORMATION

FIRST AID
The First Aid staff is located inside the Family Health & Services Center sponsored by Highmark in the Pioneer Frontier℠ area next to the Play Dome Arcade. The staff at First Aid is professionally trained and prepared to provide assistance to any guest who may require First Aid. For emergency help, please contact any Park personnel. Two additional First Aid Stations are located throughout the Park — one in The Boardwalk at Hersheypark®, sponsored by Highmark (Memorial Day - Labor Day) and in Hershey’s Chocolatetown℠ themed area.

FOOD & BEVERAGE
Some Hersheypark food and beverage facilities throughout the park may present access difficulties. Please see Park personnel for assistance if needed.

FOR GUESTS WITH A HEARING IMPAIRMENT
Assistive listening systems are located in the Aquatheatre, and Chevrolet® Music Box Theatre. Please arrive 20 minutes prior to show time and speak with a host or hostess for assistance. A driver’s license will be held as a deposit.

If you are not able to hear attraction loading and unloading instructions, please notify Park Personnel prior to boarding the attraction. Show scripts and written attraction safety speeches/directions are available upon request of Park personnel.

GAMES
Play Dome℠ and Overlook℠ Arcades are accessible. Please see Park personnel at these locations if assistance of any kind is needed.

GUESTS ACCOMPANIED BY SERVICE ANIMALS
Service animals are welcome at Hersheypark and ZooAmerica®. Service animals are limited to dogs and miniature horses that have been individually trained to do work or perform tasks for the benefit of the individual with a disability. Service animals must remain on a leash or harness and/or under the control of their handler at all times and be house broken. If at any time a service animal’s behavior is out of control, the guest will be asked to remove the service animal from the Park. Although service animals are discouraged from riding any attraction, service animals will be permitted on the Monorail, Carrousel (chariots only), Kissing Tower®, Dry Gulch Railroad, Ferris Wheel, Sunoco® Classic Cars, and they will be permitted to enter The Boardwalk water attractions up to the water’s edge. Service animals will not be permitted to enter the water at any attraction. On all other attractions, someone in the guest’s party must stay with the service animal while the guest rides the attraction. Service animals must remain a reasonable distance from the Park’s and/or Zoo’s resident animals. Service animals may use any green space for voiding waste; however, the guest is responsible for cleaning up after the animal.

QUIET AREAS
Several quiet locations have been identified throughout Hersheypark. These locations provide a nice break from sensory stimulation. The quiet locations are located at: Guest Services inside the Family Health & Services Center sponsored by Highmark in the Pioneer Frontier area, and Guest Services in the Kissing Tower Hill area of the Park.

GENERAL INFORMATION

PARKING
Hersheypark Entertainment Complex provides accessible parking spaces in our main lots. Parking is available on a first-come-first-serve basis. From the parking lot tollbooths, follow posted signs for accessible parking. Accessible trams are available in the parking lot.

PARK TERRAIN
Although the natural terrain adds to the beauty of the Hersheypark landscape, it also creates some challenges. Please refer to the Hersheypark Map & Guide for assistance in identifying steep grades and stairs within the Park.

PERSONAL CARE ATTENDANT
Tickets for Personal Care Attendants must be purchased at Ticketing Services located outside Hersheypark. The cost of a Hersheypark admission ticket will be waived for a government-funded or paid Personal Care Attendant (PCA) whose attendance is required to enable guests with severe disabilities to access and enjoy the Park’s goods, services, and attractions. Whether admission tickets are purchased in advance or at the Park’s Ticketing Services window, any request to waive admission for a PCA must be made at the Park’s Guest Services Office, which is located outside the main admission gate. The PCA shall not participate in any services and attractions separate and apart from the guest who requires the assistance of the PCA. If the Park discovers that the guest or the PCA has misrepresented the purpose of the PCA’s attendance, or that the PCA has acted as a guest rather than as a PCA while at the Park, both the PCA and the guest will be ejected from the Park and may be barred from future entry.

RESTROOMS
All restrooms identified in the Hersheypark Map & Guide are accessible. If guests need space for a lateral transfer, use one of the following restrooms: next to the Country Grill, inside the Tidal Force changing rooms, in The Boardwalk, in Kissing Tower Hill, and in ZooAmerica. All-gender restrooms are available in Midway America℠ themed area, The Hollow℠ themed area, The Boardwalk at Hersheypark, at Chick-fil-A, and in the entrance plaza of Hershey’s Chocolatetown®.

RETAIL
All shops provide accessibility. Ask store personnel for assistance in obtaining any hard-to-reach items.
SEGWAY® & GOLF CARTS
Due to the different pathway configuration and terrain as well as large crowds that include small children and strollers, we regret that we cannot permit the use of golf carts or two-wheeled, self-balancing electric vehicles, such as Segways, in Hersheypark and ZooAmerica.

SHOWS & DEMONSTRATIONS
All guests may enjoy all Hersheypark shows. Guests using wheelchairs or other mobility devices may enter the Aquatheatre from the upper or lower level entrances. Guests using wheelchairs or other mobility devices may enter the Chevrolet Music Box Theatre through the main entrance. Please speak with Park personnel for assistance and direction. Accessible seating is limited; please arrive 20 minutes prior to show time if you need assistance from a host or hostess.

SMOKING
As we strive to accommodate all of our guests, designated smoking areas have been established throughout Hersheypark. The Boardwalk At Hershey park and ZooAmerica locations are smoke-free.

WHEELCHAIRS & ELECTRIC CONVENIENCE VEHICLES
Wheelchairs and Electric Convenience Vehicles (ECVs) for adults can be rented at Hersheypark. Both manual wheelchairs and ECVs have weight limitations of 450 pounds and are available on a first-come-first-serve basis. Quantities are limited. A valid driver’s license will be held as a deposit. Must be 18 yrs. or older to rent. Failure to comply with the rental agreement is cause for surrender of the rental equipment or removal from the Park. Hersheypark reserves the right to refuse any guest rental of an ECV if that guest is unable to complete the on-site training or unable to comply with the restrictions of the unit. Guests are also invited to bring their personal ECV or mobility device (with the exception of golf carts and two-wheeled balancing electric vehicles, such as a Segways) to Hersheypark. Guests visiting The Boardwalk at Hersheypark may utilize an aquatic wheelchair at certain Boardwalk attractions. See a lifeguard at The Boardwalk at Hersheypark for more information.

ZOOAMERICA
Automatic doors are located at every building entrance. Accessible walkways and ramps allow access to all exhibits. Some viewing angles are not accessible, but in every case alternative-viewing areas provide excellent appreciation of the wildlife. Please see ZooAmerica personnel for assistance.
PROSTHETICS/BRACES AND CASTS
Due to the individual designs of attractions, guests with casts or braces may have difficulty fitting properly into the restraints of certain attractions. Any guest with a cast or brace who cannot be properly restrained will not be permitted to ride. On most attractions, guests with a prosthetic device will be allowed to ride as long as the prosthetic device is properly secured and will remain in place during the ride.

For Fahrenheit, Storm Runner, Hershey Triple Tower, and Laff Trakk®, guests wearing one prosthetic leg must remove the prosthesis or have written documentation from the limb manufacturer ensuring that the limb can withstand forces up to 5 Gs and not come off during the ride cycle. If guests must remove the prosthetic leg, the restraint must be in contact with a residual limb below the knee to keep the guest properly restrained. Guests wearing two prosthetic legs must wear at least one of their prosthetic legs as this is critical for bracing required during the ride cycle. As a reminder, all guests wearing prosthetics on the ride must have manufacturer issued documentation regarding the prosthetic’s ability to withstand forces up to 5 Gs.

Guests riding the Hershey Triple Tower must remove their prostheses or have written documentation from the limb manufacturer ensuring that the limb can withstand forces up to 5 Gs and not come off during the ride cycle. If guests must remove the prosthetic leg, the restraint must come in contact with residual limbs below the knee to keep the guest properly restrained. Guests must have one naturally occurring arm with at least three fingers in order to ride.

MAGNETIC FIELDS ON RIDES
Magnetics are used in the configuration of the following attractions: Breakers Edge Water Coaster, Candymonium, Laff Trakk, Fahrenheit, Skyrush, sooperdooperLooper®, Storm Runner, and TrailblazerSM. Please consider these factors when deciding to ride.

GUESTS OF EXCEPTIONAL SIZE
In order to ride, all seat belts, lap bars, and shoulder harnesses must be positioned and fastened properly. Due to rider restraint system requirements, guests of exceptional size (height and/or weight) may not be accommodated on the following rides: Candymonium, Breakers Edge Water Coaster, Comet, Lightning Racer, sooperdooperLooper, The Claw, Laff Trakk, Wildcat, Skyview, Wild Mouse, SidewinderSM, Tidal Force, Storm Runner, Skyrush, Reese’s CupFusion, Coastline Plunge, Fahrenheit, Trailblazer, Breakers Edge, Sweet SwingSM, and Whitecap Racer.

Test seats are located at the ride entrance of Candymonium, Great Bear, Fahrenheit, Skyrush, Storm Runner, Laff Trakk, and Hershey Triple Tower, and we recommend utilizing these before entering the attraction queue.

ADDITIONAL INFORMATION

MECHANICAL / POWER FAILURE / ADVERSE WEATHER
Though it is rare, a mechanical problem, power failure, or sudden adverse weather condition may lead to a stoppage of the attractions. In that event, riders may be required to maneuver across catwalks or travel down steeply inclined ramps or steps. Please consider these factors when deciding to ride.

LOOSE ARTICLES
Due to ride dynamics, loose articles are not permitted on rides and must be left with non-riders or secured in lockers. Loose or hand-held articles include, but are not limited to, cameras, cell phones, costumes, scarves, loose fitting head wear, hats, pagers, purses, stuffed animals, basketballs, radios, loose fitting jewelry, keys, glasses, backpacks, etc. Hersheypark and its employees are not responsible for lost or stolen items which include items that fall out of pockets.

*Operation of attractions will not be suspended to retrieve lost items.

DEFINITIONS
Every Hersheypark attraction entrance lists height requirements and special instructions regarding the attraction. Hersheypark uses the following terms:

Attraction: An amusement ride that is governed and inspected by the Commonwealth of Pennsylvania, Department of Agriculture. An inspection placard is located at each attraction’s entrance.

Hand-Held Infant: A hand-held infant is a child who is unable to walk to the attraction independently or maintain independent seated postural control.

Supervising Companion: The accompanying person must meet all the attraction requirements, as well as assist the guest. This includes helping the guest in the loading and unloading of the attraction, assisting the guest in maintaining postural control while the attraction is in motion, and assisting the guest down stairs, catwalks, or steeply inclined ramps in case of mechanical / power failure / adverse weather.
RIDERSHIP CRITERIA

The evaluation of a guest’s ability to ride each attraction safely is based on the following criteria:

1. Control of upper torso including head and neck (ability to hold head upright): The guest must have sufficient muscle control to support their head, neck, and upper torso in the proper position throughout the duration of the attraction, including the dynamic motion of the attraction (fast accelerations, quick decelerations, steep inclines, etc.).

2. Ability to maintain the proper riding position throughout the attraction: The guest must have the body and spinal control to maintain the proper riding position throughout the duration of the attraction without the aid of others or devices, and be able to maintain the proper riding position even during the dynamic motion of the attraction (fast accelerations, quick decelerations, steep inclines, etc.).

3. Weight distribution to allow the restraint device to function as designed: The weight distribution of the guest’s body must not interfere with any of the attractions safety and restraint devices as they were designed.

4. Ability to hold on: The guest must have the ability to use their arms and hands to maintain a grasp on an assist bar to maintain the proper riding position throughout the duration of the attraction even during the dynamic motion of the attraction (fast accelerations, quick decelerations, steep inclines, etc.).

5. Ability to brace: The guest must have the ability to use their legs to brace their body throughout the duration of the attraction, even during the dynamic motion of the attraction (fast accelerations, quick decelerations, steep inclines, etc.).

6. Ability to enter and exit the attraction without endangering self or others: The guest must be able to enter and exit the attraction without jeopardizing themselves or other people and be able to assist with their own evacuation, if necessary. This may include entering through an exit or having someone assist the guest when boarding the attraction. If a guest needs to be lifted into or out of an attraction, this must be done by a Supervising Companion or other member in the guest’s party who is accustomed to doing this task. Park personnel may not assist with the lifting or transferring out of wheelchairs or other mobility devices.

7. Appropriate observed behavior: Guests must demonstrate appropriate observed behavior by indicating a willingness and ability to understand, participate, and follow all rider requirements. This may include, but is not limited to, maintaining the proper riding position, attention to and compliance with safety instructions, proper use of restraints and safety equipment, and willingness to participate in the attraction.

HEALTH & HEIGHT CRITERIA

ATTRACTION INFORMATION
A description of each major attraction is arranged alphabetically on the following pages. Each description contains the Health Recommendation Key, Height Restriction Key, Attraction Rating, health recommendations, and directions to the accessible entrance.

HEALTH RECOMMENDATION KEY
It is recommended that guests with the following conditions refrain from riding the indicated attractions:

- Back, neck, or bone condition
- Heart trouble
- Pregnancy
- High blood pressure
- Recent surgery or illness

Identifies attractions where guests may remain in a wheelchair.

Identifies attractions that can accommodate guests who are able to leave their wheelchair and walk or be assisted by their companion to the ride entrance. This may require navigation of steps or raised ride platforms.

Identifies attractions that can accommodate guests who are able to transfer from a wheelchair to the ride unit or aquatic wheelchair. Guests must be accompanied by a companion who can assist with transfer. Park personnel are not permitted to physically assist guests with transferring from their wheelchairs.

HEIGHT RESTRICTION KEY - Each attraction height requirement is represented by a Hershey’s candy brand. Guests can stop by any Guest Services location inside Hersheypark to be officially measured and assigned a height category.

Guests must be accompanied by a Supervising Companion.

+ No hand-held infants.

Ω Must wear a Coast Guard approved life jacket while swimming in this attraction.

Height requirements are posted at each attraction. All guests, including those using a wheelchair or other mobility device, must meet the height requirements.
From MILD to WILD, our way to rate the attractions!

Please refer to numbers next to each attraction name.

Some rides may appear tame but are actually quite thrilling. The Attractions Rating System allows guests to select attractions based on their experience level, physical condition, and abilities. Every attraction is grouped into one of five categories:

1. **CHILDREN’S ATTRACTIONS** - This is a low-speed, gentle attraction intended for young children and may accommodate chaperones where permitted.

2. **MILD THRILL ATTRACTIONS** - This is a low to medium speed attraction with expected changes in elevation and speed. This attraction is not intended for unaccompanied toddlers or very young children.

3. **MODERATE THRILL ATTRACTIONS** - This is a medium speed attraction where riders may experience unexpected changes in elevation and speed. This attraction may contain moderate twists, turns, bumps, spins, and loops, and requires full rider body control.

4. **HIGH THRILL ATTRACTIONS** - This is a fast paced attraction experience with unexpected changes in speed, direction, and/or elevation. This attraction may contain significant twists, turns, bumps, spins, and loops, and requires full rider body control.

5. **AGGRESSIVE THRILL ATTRACTIONS** - This is a high-speed attraction experience. Riders will experience many unexpected, rapid changes in speed, direction, and/or elevation requiring full rider body control. This attraction is not recommended for guests with physical, cognitive, and/or medical limitations.

Please refer to numbers next to each ride name.
**ATTRACTIONS**

**Bayside Pier℠**

Splash around in our children’s wave pool. **Bayside Pier** features a small slide and various water elements near the pool edge. Guests must be able to swim. Only appropriate swimwear is permitted on this attraction. Revealing bathing suits, shorts with rivets, snaps, zippers, metal ornamentation, cutoffs, and jeans are not permitted. Parents accompanying children must also wear bathing suits. The Pennsylvania Department of Health has instituted a maximum number of allowed guests in this attraction. Once this number is achieved a queue will be formed. As guests exit the attraction, additional guests will be permitted to enter. Due to capacity and safety standards, timed swim sessions may be initiated to ensure that each guest may safely enjoy time in this attraction. In an effort to provide the safest and best guest experience, guests of the Miniatures height category must wear a Coast Guard approved life jacket. Weaker swimmers must wear a Coast Guard approved life jacket.

**Maximum Water Depth:** 3 1/2 feet

These Health Recommendations apply to the entire attraction:

These Health Recommendations apply to the slide on this attraction:

**Height Restrictions:**

**Ride Access:** Non-ambulatory guests may access Bayside Pier from the zero-depth entry points. Guests utilizing Electric Convenience Vehicles, wheelchairs, or other mobility devices must transfer to an aquatic wheelchair to enter **Bayside Pier**. Guests may then enter through the blue door after the lifeguard has granted permission.

**Weight Limit:** There is a 300 lb. weight limit on the slide for this attraction.

**ATTRACTIONS**

**Breakers Edge℠ Water Coaster**

**Breakers Edge** Water Coaster is a water ride which mimics similar actions of a traditional roller coaster including sudden drops, and tight turns. Each rider should have the physical abilities to support themselves in an upright riding position, while grasping the handles at all times, during the course of the ride and landing area. Riders will encounter strong acceleration and deceleration forces from the front, rear, and all sides during the course of the ride. The riders sit upright in a raft while holding onto the handles. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position throughout the ride and be able to brace for rapid deceleration at the end of the ride. Only appropriate swimwear is permitted on this attraction. Revealing bathing suits, shorts with rivets, snaps, zippers, metal ornamentation, cutoffs, and jeans are not permitted. Individual rafts DO NOT STOP at the loading and unloading locations. If you need the rafts to be stopped, please alert the ride operator. Guests need to transfer in and out of the ride. The combined weight of the riders in one ride vehicle must be between 100 and 700 pounds. Scales available at attraction entrance and station. Single riders not permitted and will be paired with another group.

**Health Recommendations:**

**Height Restrictions:**

**Ride Access:** Non-ambulatory guests should enter through the ride exit or elevator and contact the ride attendant for assistance.

**Weight Limit:** The combined weight of the riders in one ride vehicle may not exceed 700 pounds.

**Accessibility:**

---

---
**Carrousel**

This ride is a classic carrousel with 66 horses and two chariots. Guests need to step up onto the ride platform and transfer in and out of chariots or onto the horses. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position during a fast ride, and be able to brace for rapid deceleration. Guests with prosthetic(s) should see the ride attendant or visit Guest Services for more information. Guests with casts or hard braces will not be permitted to ride. This ride may not accommodate guests of exceptional size (height/weight).

**Health Recommendations:** None

**Height Restrictions:**

**Ride Access:** Non-ambulatory guests should enter through the accessible entrance after receiving permission from the ride attendant. One chariot is accessible and can accommodate one wheelchair or mobility device.

**Accessibility:**

This ride accommodates service animals in the chariots only.

---

**Candymonium**

This is a steel coaster, with a height of 210 feet. This is a very aggressive ride with high speed/high banked turns, several airtime hills, and speeds of 76 mph. Guests need to transfer in and out of cars. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position during a fast ride, and be able to brace for rapid deceleration. Guests with prosthetic(s) should see the ride attendant or visit Guest Services for more information. Guests with casts or hard braces will not be permitted to ride. This ride may not accommodate guests of exceptional size (height/weight).

**Health Recommendations:** None

**Height Restrictions:**

**Ride Access:** Non-ambulatory guests should enter through the ride exit or elevator and contact the ride attendant for assistance. Ambulatory guests will enter through the Fast Track entrance at the front of the attraction.

**Accessibility:**

**Coal Cracker SM**

This is a water, log flume with two inclines and one drop. This ride is not accessible to guests using wheelchairs. Guests must use a stairway to gain access to the ride platform. Guests must step down into the boat and straddle a bench seat while holding onto side handrails. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position throughout the ride. Riders may get wet.

**Health Recommendations:**

**Height Restrictions:**

**Ride Access:** Non-ambulatory guests should enter through the ride exit (staircase) and contact a ride attendant for assistance.

**Accessibility:**

**Coastline Plunge SM**

Coastline Plunge consists of six separate water slides that require tubes. Hydro, Pipeline, Riptide, and Surge are enclosed water slides that consist of twists and turns. Vortex is a large bowl slide, which is partially enclosed where you ride in circles in the bowl. Whirlwind is a large slide that looks like a funnel, which is partially enclosed, you ride back and forth in the “funnel.” Coastline Plunge water slides are not accessible by wheelchair; the queue for this attraction includes a flight of stairs. All slides exit into a 3 1/2 foot splash pool of water. Guests who ride must be able to swim. Guests need to transfer in and out of the tube. The riders sit upright in a tube while holding onto the handles. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position throughout the ride and be able to brace for entering the splash pool at the end of the ride. Only appropriate swimwear is permitted on this attraction. Revealing bathing suits, shorts with rivets, snaps, zippers, metal ornamentation, cutoffs, and jeans are not permitted. Parents accompanying children must also wear bathing suits.

**Maximum Water Depth:** 3 1/2 feet

**Health Recommendations:**

**Height Restrictions for Hydro, Pipeline, Riptide, and Surge:**

**Height Restrictions for Vortex and Whirlwind:**

**Ride Access:** Coastline Plunge is not accessible by wheelchair or other mobility device. Non-ambulatory guests must enter through the ride entrance which includes a flight of stairs. Guests with disabilities who wish to experience the Coastline Plunge ride must wait in line and carry tube.

**Weight Limit:** There is a 250 lb. weight limit on the pink single tubes and a 400 lb. weight limit on the blue double tubes and the green Whirly Wheel tubes.
Cocoa Cruiser™
This ride is a steel coaster for families to enjoy. This coaster features a 12-foot drop and mild turns and speeds. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position during the ride.

Health Recommendations:

Height Restrictions:

Ride Access: Non-ambulatory guests should enter through the exit after receiving permission from the ride attendant.

Accessibility:

Comet™
This is a wooden coaster with a 96-foot drop and a 60-foot drop, reaching speeds of 50 mph. Guests need to transfer in and out of cars. Guests need to be able to hold their heads upright and have an appropriate center of gravity for bracing to maintain a seated position during a fast ride, and be able to brace for possible rapid deceleration.

Health Recommendations:

Height Restrictions:

Ride Access: Non-ambulatory guests should enter through the ride exit and contact the ride attendant for assistance.

Accessibility:

Convoy™
This is a miniature truck flat ride. This ride is reserved for children and one taller companion. Guests need to transfer in and out of the ride. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position throughout the ride.

Health Recommendations: None

Height Restrictions:

Ride Access: Non-ambulatory guests should enter through the exit after receiving permission from the ride attendant.

Accessibility:

Dizzy Drums™
This is a flat, circular ride with individual cars that can be spun while the entire ride rotates. This ride is reserved for children. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position throughout the ride.

Health Recommendations: None

Height Restrictions:

Ride Access: Non-ambulatory guests should enter through the ride exit after receiving permission from the ride attendant.

Accessibility:

Dry Gulch Railroad™
This ride consists of two smaller scale steam engine trains. The rear car of one train is wheelchair accessible; however, guests must transfer into and out of the other seats of the trains. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position throughout the ride.

Health Recommendations: None

Height Restrictions:

Ride Access: Non-ambulatory guests should enter through the ride exit after receiving permission from the ride attendant. One train car is accessible and can accommodate one wheelchair or mobility device.

Accessibility:

This attraction accommodates service animals.
East Coast Waterworks™

East Coast Waterworks features six slides, crawl tunnels, nearly 200 interactive water toys, and more than 54,000 gallons of wet, refreshing fun for all ages. Each water slide on the attraction has its own height restriction, which is displayed at the entrance of each slide. Please ask a lifeguard for specific height restrictions for each slide. Each guest needs to be able to hold their head upright while in the seated position and have an appropriate center of gravity for bracing to maintain a seated position throughout the ride and be able to brace for deceleration in the slide run-out. Only appropriate swimwear is permitted on this attraction. Revealing bathing suits, shorts with rivets, snaps, zippers, metal ornamentation, cutoffs, and jeans are not permitted. Parents accompanying children must also wear bathing suits. The Pennsylvania Department of Health has instituted a maximum number of allowed guests in this attraction. Once this number is achieved a queue will be formed. As guests exit the attraction, additional guests will be permitted to enter.

**Wildcat<sup>SM</sup>**

This is a wooden roller coaster with an 85-foot drop on the first hill, reaching speeds of 48 mph with several twisting curves. Guests need to transfer in and out of cars. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position during a fast ride, and be able to brace for possible rapid deceleration.

*Health Recommendations:*

- Height Restrictions:

  *Ride Access:* Non-ambulatory guests should enter through the ride exit and contact the ride attendant for assistance. Ambulatory guests will enter through the *Fast Track* entrance at the front of the attraction.

  *Accessibility:*

**Wild Mouse<sup>SM</sup>**

This is a coaster-type ride with many tight turns, steep hills, and rapid deceleration. Individual cars DO NOT STOP at the loading and unloading locations. If you need the cars to be stopped, please alert the ride operator. Guests need to transfer in and out of the ride. Each guest needs to be able to hold their head upright and have an appropriate center of gravity for bracing to maintain a seated position during the fast ride, and be able to brace for possible rapid deceleration.
